

KNet MaaS for Windows Phone Powered by Fiberlink's MaaS360

Provision, manage and secure Windows Phone devices, apps and documents

Manage the Devices Your Colleagues Want

The KNet MaaS platform offers something no other vendor does; true software-as-a-service (SaaS) that delivers instant enterprise Mobile Device Management (MDM) and Mobile Application Management (MAM) – all from a single platform.

KNet MaaS for Windows Phone gives you a cloud-based console to enroll devices over-the-air; configure corporate policies; support devices, users, apps and documents; and monitor and report on your entire mobile IT environment. KNet MaaS leverages the Microsoft MDM APIs and Push Notification service.

Windows Phone will grow to >11% of total smartphone market share by 2016

- IDC Worldwide Mobile Phone Tracker

Built on a secure, multi-tenant cloud architecture, KNet MaaS enables robust enterprise mobility management (EMM) in just minutes. It gives you effortless scalability, whether you have 10 users or 100,000, and seamless integration into existing enterprise systems. And because there are no servers to install, upgrades to the latest technology are automatic. Affordability is unmatched with no upfront costs and no expensive change management.

KNet MaaS makes it easy for you to finally say “Yes!” to the latest devices, both personal and corporate owned.

KNet MaaS can help you manage Windows Phone devices, apps and data. Our 100% cloud-based platform delivers fast support for all new mobile OS releases and upgrades.

KNet MaaS supports the latest Windows Phone releases, including the family of Windows Phone 7 and 8 devices.

Support for Windows Phone

- Enroll over-the-air (OTA) using Microsoft's prepackaged device management client
- Require passcodes and specify their quality
- Enforce device encryption
- Disable the SD Card
- Configure and distribute policies for Exchange ActiveSync
- Configure IMAP/POP email settings
- Set compliance rules for OS versions
- Distribute both enterprise and public apps using the Company Hub
- Actions for Help Desk support: locate the device, send messages to the device, etc.

Get the Visibility and Control You Need

KNet MaaS for Windows Phone provides the visibility and control your IT staff needs to support the unified Windows devices in the Enterprise. KNet MaaS supports the latest Windows Phone releases, including the family of Windows Phone 7 and 8 devices.

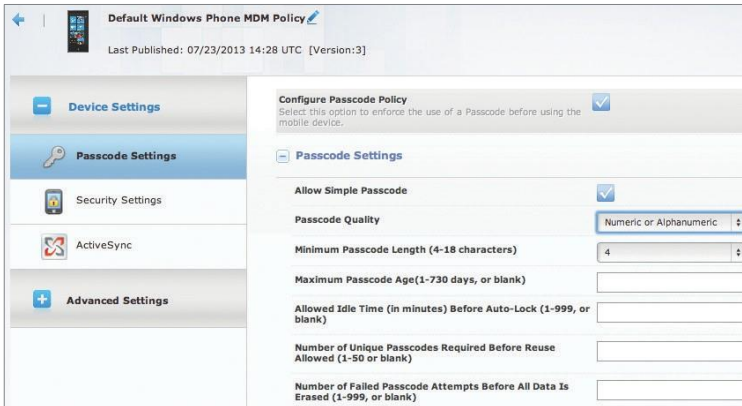

You can now have the tools you need to gain insight, perform actions, set and distribute policies, manage apps and documents, and much more.

Gain Insight

- Manufacturer & model
- Serial number
- Operating system
- Current carrier
 - MAC address
- Location information
- Device ID (IMEI, email address)
 - Screen language
 - Screen resolution
 - Firmware version
- Installed profiles
- MSFT Push Notification
- Company Hub

Perform Actions

- Refresh device details in real-time
- Perform a full wipe of a lost device
- Selectively wipe corporate data while maintaining personal data on an employee-owned device
- Send a message to the device
- Find the last known location
- Change Windows Phone policy

Set & Distribute Policies

- Enforce passcode requirements
- Configure security settings
 - Enforce device encryption
 - Disable SD card
- Configure email settings
 - IMAP and POP
- Configure and distribute Exchange ActiveSync settings

Application Catalog

Enterprise App Manageability: Mobile apps distributed by KNet MaaS to Windows Phone devices become fully controlled, allowing you to simplify app deployments while increasing manageability.

- Distribute apps via Company Hub
- Distribute “home grown” apps
- Publish updates to apps
- Remotely push an app to a device
- Delete an app & its data, on-demand or as part of a selective or full wipe action
- Automatically remove corporate apps if the user deletes the MDM profile on the device
